Video Router

Bridge the Gap Between Analog & Software Recording Solutions

WHAT: Product Demos & Information from Video Protein

WHEN: Tuesday, July 28, 2009
11:00am - 1:00pm

WHERE: SMC Training Center
509 N. Washington
Springfield, MO

COST: FREE

Come Experience the Industry's First Plug and View IP Video Router!

This flexibility even enables integration with existing equipment, meaning you can leverage previous equipment investments while still upgrading your system to the next generation in security technology!

VIDEORouter allows integrators and installers to deploy at a faster pace, decreasing install times while deploying more systems.

- Auto Discovery/Self-Configuring
- No Special IP Networking Skills Required
- Reduced Install Times
- 4 or 8 Port Power Over Ethernet (POE)
- Edge Device - Minimizes Network Traffic
- Works Behind Firewall/Routers
- Uses Private IP Over VPN
- Storage at the Edge
- No need to access camera web interface: this is handled by the VideoProtein camera driver
- Optional wireless
- Half-2U size means you can mount 2 VideoRouter units on a single 2U rack space
- Easy integration with existing CCTV systems as a replacement or in parallel by splitting video source and connecting to CCTV with an IP Video converter
