

# Safety Circuit Wiring

## Master Safety Circuit Wiring with SMC

Boost your plant's troubleshooting skills with our hands-on course designed for entry-level personnel.

Led by product specialists, this blend of lecture and practical labs teaches your team to install, wire, commission, and troubleshoot modern and legacy safety circuits.

Equip your staff with the vital, real-world skills needed to confidently manage single and dual channel safety relays, and sensors right on the manufacturing floor.

**Thursday, Sept. 24**  
**8 AM - 4 PM**

**SMC Springfield**  
**585 N. Washington**  
**Springfield, MO**

**Cost: \$750**  
***Includes Lunch***
