

AUTOMATION

Motion Headquarters

Join us for a day of learning and hands-on training for a better understanding of mechatronics.

We will focus on Motion Control, starting with the "Physics for Motion," and dive into motors and sizing, application and installation considerations, and best practices. We'll finish the session discussing, "5-Minutes to Motion, the ease of using Rockwell Automation Integrated Motion," and highlight the Tuning Rig Demo featuring RA "tuningless" features.

Through our demo boxes, the afternoon will provide attendees an opportunity to learn more about the ArmorKinetix® Distributed Servo Drives and Motor, Kinetix® 5700, and GuardLogix High Performance.

Thursday, August 6

8 AM - 5 PM

**SMC Springfield
585 N Washington Ave
Springfield, MO**

**Cost
\$150**

Includes Lunch
