EWON REMOTE DATA (FLEXY) TRAINING

TRAINING EVENT

The course will provide what you need to know to configure and use an Ewon Flexy IIoT gateway for remote access, remote data monitoring and data logging. You will learn how to use the associated tools (eBuddy, eCatcher, M2Web and eCatcher Mobile) to configure, monitor and troubleshoot systems. The course will also cover data formatting and management in the Ewon Flexy gateway, BASIC scripting and custom dashboards. The training course fee includes an Ewon Flexy IIoT Starter-Kit.

What will you learn?

- Ewon Flexy gateway hardware options and installations
- Understanding of the Talk2M cloud and security
- Remote access configuration & testing
- Remote data configuration including alarms and data logging
- How to use the M2Web remote viewing tool
- Data formatting, management and exporting to the cloud
- Task planning and an introduction to BASIC Scripting
- Custom dashboards / webpages

Outcome: You will leave the course with knowledge of all the tools available to install and commission an Ewon Flexy IIoT gateway, set up remote VPN access to your on-site systems and create an effective data logging and alarm monitoring, cloud-based solution.

+ HANDS-ON

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises.

COST

$750
Includes Lunch
